Brief About the Product: Sprint Brand Dust Collection Woven/Non-Woven Filter Bags are manufactured for achieving optimum filtration performance. They are made from carefully selected mediasuch as needle felt, monofilament and multi-filament. These bags are highly effective in reducing dust emission levels as per requirement of industries. The filter bags are placed in dust collector with supporting filter cages. Contaminated air takes path from outside to inside filtration. All solid contaminants get deposited at outer surface & clean air / gas passes through the top chamber. Particles retained at the outer surface of media get collected at the bottom of dust collector with the help of shaking mechanism or reverse pulse jetting mechanism.
