Brief About the Product: Sprint Brand Hepa Filters are designed to meet requirements of very fine filtration up to 0.3 micron at high efficiency of 99.99 %. We have added a new feature in conventional Hepa Filters by using spun bonded polyester media which is easy to clean and maintain. These filters are available with different coatings like PTFE coating, PTFE lamination & more for better dust releasing. Due to hydrophobic & oleo phobic treatment on media, it does not allow any moisture & oil contents to pass through it.
