The material of Filter media of this cartridge contains modified cellulose. This filter media will remove upto 95% of total hydrocarbon elements from water in just a single pass. Dissolved oil, emulsions & dispersed droplets are also adsorbed and retained from water by filter media.

**Material Composition:** Sprint Brand Oil adsorbing filter cartridges are made by rolling the sheet material onto a central core support. The core & outer surface of filter media rolls are covered with retaining mesh. The complete module is then encapsulated in to end caps

	suitable for fitting into a variety of housing configurations.
