Brief About the Product: Sprint Brand PTFE (Poly Tetra Fluoro Ethylene) Filter Cartridge are made up of poly tetrafluoroethylene. Sprint Brand PTFE is characterized by high chemical inertness. Sprint Brand PTFE (Poly Tetra Fluoro Ethylene) Filter Cartridge are specifically designed for sterile filtration applications of liquid, air & gas streams. Sprint Brand PTFE (Poly Tetra Fluoro Ethylene) Filter Cartridge are certified, bio-safe, non-pyrogenic & fully validated to pharmaceutical standards. PTFE and polypropylene, the unique two materials used in cartridge manufacturing are chemically inert, not shedding and biologically safe according to F.D.A., USP and EEC requirements for pharmaceutical and food contact usages. PTFE cartridge membrane is used in filtering the highly

	<p>corrosive solutions such as strong acids, base solution, and solvents. The membrane has about 80 – 95 % porosity & uniform pore size distribution.</p> <p>Moreover, the filtration area of each cartridge is as high as 0.7 m². Therefore, it offers a high flow rate, low-pressure drop & long service life. These can be steam sterilized directly or reverse as per standardized operating data.</p> <p>Material Composition: They are made of following material such as – Filter media - 100 % PTFE (Poly Tetra fluoroethylene) Membrane Support media- Polypropylene fiber 'O' Ring/ Gaskets - EPDM / Buna N / Silicone / Viton</p>
<p><u>QUALITY APPROACH:</u> We at SSBS are committed to meet our customers' requirements for their entire satisfaction.
