Brief About the Product: Sprint Brand Polypropylene Pleated Cartridge are precisely manufactured for usage in critical filtration applications within food, pharmaceuticals, biotech, dairy, beverages, brewing, semiconductor, water treatment & other demanding process industries.

Polypropylene pleated cartridges use the very latest gradient density microfiber media technology to provide a combination of excellent micron ratings, high flow rates, and high contaminant holding capacities. A special combination of polypropylene media with variation in the fiber diameter creates a gradient density matrix, ranging from open on the outside to finer on the inside, thereby providing a filter within filter, which considerably increases contamination holding capacity & throughputs.
